

## Keep Track of Material & Resources for Smarter Inventory

Get the Best Resource Management Software for Construction Material Planning

ProjectPro provides job material planning capabilities that enable the user to keep track of actual materials and resources critical for jobs. Now users can manage what exact items are needed on the job by “Required Dates.”

- ✓ Track actual materials and resources
- ✓ Know which items are already available in your warehouse
- ✓ Manage what specific items are needed on the job by “Required Dates”
- ✓ Auto-create the Purchase Orders
- ✓ Auto-suggest for items to be purchased

## Manage Material Resources along with Auto Suggestions on Items Required

**Streamline Resource Management:** We ensure that you monitor and utilize the proper resources for assignments.

**Saves you Time:** Rather than entering data manually, you can input everything once and carry it across the company.

**Real-Time Inventory:** Gain real-time insights into data to avoid shortages or overstocking in your inventory. Scan items with relevant barcode scanners for seamless flow.

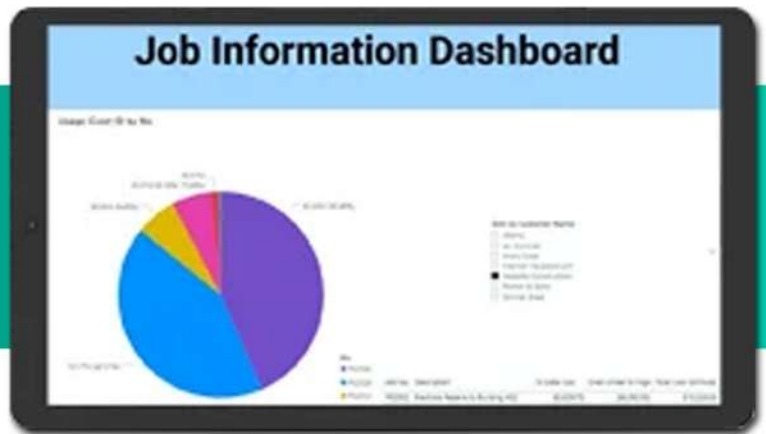

**Document Management:** Documents containing data and reports can be stored in one centralized location with easy access.

**Project Purchasing Process:** Procure job materials and resource with precise timing based on job delivery schedule requirements.

## Trust ProjectPro for all your Job Material Planning Needs

### Streamline your Job, Task and Staff Management using ProjectPro

ProjectPro improves the job material planning process and automatically suggests items needed to be purchased and will create the purchase orders as well.

We understand several challenges are faced by construction professionals, and so ProjectPro ensures to meet your unique requirements.

#### View Your Job at Fingertips

ProjectPro enables you to take and record every detail on every job so that you can manage everything under one roof.

#### Improve Overall Efficiency

You can allocate the tasks to the team along with a checklist of to-dos. This will help you keep track of estimates and due dates for the project.

#### Material Planning Made Easier

You can see how much work your staff members did as per their allocation. Also, keep track of inventory and other materials.

#### Access to Real-time Data

Administer real-time teams, sales and inventory operations to increase speed and productivity.

#### Employ Priority-Based Production Planning

Utilize drag-and-drop features to highlight orders for simplified material and finished product redistribution.

#### Closely Monitor Actual Expenses

According to BOMs and production processes, craft multi-level BOMs that include subassemblies.

“ We've been using ProjectPro for over ten (10) years now and it has helped us to manage our jobs and accounting operations from two locations and still all within one database. We have been able to keep our project costs current and generate our job billings timely.

Janet Beaton  
Office Manager, GRIFFIN INSULATION
