

**ProjectPro with Business Central was instrumental in enhancing construction capabilities for the Civil Construction Company and assisted with Project Management to help it prepare for future growth and success.**

## THE CLIENT

The Client is an established contractor and a leading provider of specialized contracting services. Their services begin with design/engineering and continue through field execution of all stages, culminating in the project's successful completion.

## CHALLENGES

Prior to implementing ProjectPro, the client was using Progressus, built on Dynamics NAV. However, client later switched to ProjectPro as it offers more construction-oriented functionalities that meet their unique business requirements.

- There was no standard method for sending daily field reports to their customers.
- There was no standard method for sending monthly invoices to their customers based on the time spent by its resources on tasks within the different jobs.
- Unable to streamline Project Managers' month-end job forecasts.
- Inability to manage and segment project activities into various segments.
- There was no uniform cost code structure in the organization.
- Calculating bi-weekly payroll was a time-consuming job.
- Multiple formats of AIA Progress Billings.
- No uniform method for managing work orders.

## TECHNOLOGY USED

Microsoft Dynamics Business Central and ProjectPro

## APPROACH & SOLUTION

The client leveraged ProjectPro in combination with Microsoft Dynamics Business Central to tackle all project management and construction-related challenges. They were able to control their job costing, project billings, project scheduling, and payroll estimates using ProjectPro's capabilities.

## MODULES IMPLEMENTED

- ProjectPro Enterprise
  - Advanced Job Costing
  - Progress Billings with Retention
  - Subcontract Management
  - Job Material Planning
  - Advance Job Labor

## THE BENEFITS

- Standardized their cost code structure, including the ability to use job templates.
- Ability to roll up sub-jobs and service jobs into master jobs for reporting and analysis using the job class relationships.
- Manage the daily field tracking of their resources and monthly billing to their customers based on this information.
- Ability to use one software for payroll calculations based on timesheets entered by resources on multiple projects.
- AIA Progress Billings with the ability to group and summarize contract lines.
- Enhanced project management and operations monitoring by offering real-time project output visibility.
- We were able to enhance the sourcing of materials and components for jobs by managing what products need to be purchased and when they are needed on the job.
- Ability to keep track of things that have been delivered to the job site.
- Improved Project Manager's month-end job forecasting process and accuracy by capturing hours to complete the task and visibility to remaining committed purchase orders.

## About ProjectPro

ProjectPro is specifically designed for Construction Firms and powered by Microsoft Dynamics NAV/Business Central to make sure you get the most out of your business software. Netsmartz LLC has the software, knowledge, and means to provide your business with the most powerful yet user-friendly construction accounting system available using the latest Microsoft technologies.

ProjectPro helps businesses streamline their processes with better insights into the overall project costs, resource requirement & allocation, which offers precise and timely information.

Integrate all of your project accounting, management, labor & resources management, material planning, and customer relationship management through a dedicated solution. ProjectPro offers a smarter and better way to thrive in productivity for your construction business.
