PE-764	Enhancement	Incorrect Revenue Recognition Reversal Entries	ProjectPro Basics
PE-765	Enhancement	BC v27 Conflict – Retention Document Creation Failure	ProjectPro Basics

**Note: Details are given below in “Release Note Details”.

Release Note Details

PE-749

Enhancement – Duplicity of Rev Rec Ref Number on Revenue Recognition Summary Details

On the Revenue Recognition Summary Details, the system no longer duplicates the reference number, ensuring the reversal process functions correctly.

The Project filter in the Generate General Journal batch now supports the use of asterisks (*).

The reversal process has also been updated to work when no Project No. filter is applied and is run wide open for all projects.

PE-764

Enhancement – Incorrect Revenue Recognition Reversal Entries

The reversal entries for Revenue Recognition have been corrected. Previously, they caused a duplicated impact on the Trial Balance.

PE-765

Enhancement – BC v27 Conflict – Retention Document Creation Failure

The ProjectPro app has been updated to ensure full compatibility with Business Central 27.
