## PE-735

### Enhancement – Reversal of General Ledger Entries not associated with Project Ledger Entries

The system now allows you to perform the “Reverse Transaction” process on general ledger entries that are not linked with any project ledger entries. This is precisely the case where the ProjectPro process is used to create a GLE with Project No., but no Project Ledger Entry is created. This will also check the entries when one of the settings/templates/batches listed below is used in the Projects Setup.

PROJECTS SETUP FAST TABS	PROJECTS SETUP FIELDS
General	Received Accrual Batch Name
Labor to G/L	Labor G/L Journal Template
Labor to G/L	Labor G/L Journal Batch
Revenue Recognition	Rev. Rec. G/L Journal Template
Revenue Recognition	Rev. Rec. G/L Journal Batch
Revenue Recognition	Rev. Rec. Batch No. Series

## PE-748

### Enhancement – Draws in Bank Deposit

Previously, Draw No. was unavailable on the Bank Deposits when clicked on “Apply Entries”, which made it difficult to filter or apply receipts to invoices associated with a specific draw. So, the Draw

No. is made visible while applying entries, allowing you to easily filter and accurately apply receipts to draw-specific invoices.

**Apply Customer Entries - 10003 - Nesbitts Construction**

### Enhancement – Subcontract Commitment Line Description to PO

Earlier, when the Description was updated on the Subcontract Card, and the "Update Purchase Order" function was used, the Subcontract Commitment Line Description was overwritten with the G/L Account Name instead of the updated description.

Now, the updated Subcontract Card Description is retained correctly, and when the "Update Purchase Order" is selected, the Subcontract Commitment Line Description updates as expected without being overwritten by the G/L Account Name.
